

# Industry Leading Resharpening Services

“STI regrinds give us as much or more holes than our new Sandvik Delta C.”

“We get 3,000 - 4,000 inches with the new ‘Titex’ in 304 S.S., STI regrind give me 5,000 - 7,000 inches.”

Customers can expect  
up to 70%-90%  
tool life vs. original tool.

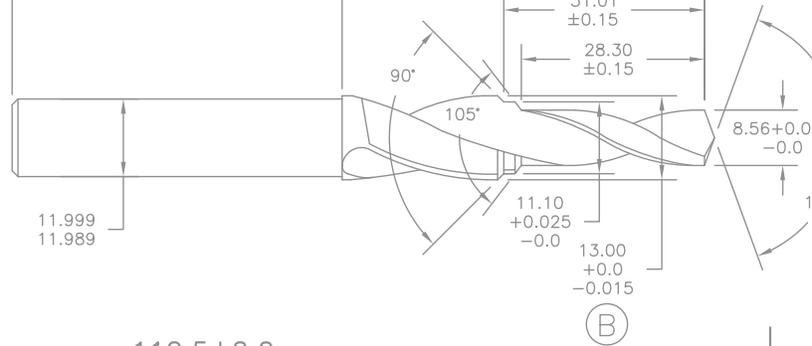

STI utilizes the latest software for sharpening all new high performance drill geometries for many brands. Our state of the art CNC grinders are recognized world wide as leading tool grinding technology. Our like new condition and huge cost savings versus buying new will impress operators and management—guaranteed!

We sharpen ALL  
high performance brands.
